EDUCATION

WORK EXPERIENCE

CSDD (Road Traffic Safety Directorate)

06/2025 – 02/2026 | IT Project Manager

Management of the development and implementation of a new queue management system, as well as maintenance and gradual replacement of the existing queue system. Work with nationwide information systems, ensuring their continuous operation, development, and modernization.

Projects:

- Requirements and documentation development for the new queue management system
- Maintenance of the existing system and coordination of its replacement
- Opening of new service stations: coordination and supervision of implementation activities

Key achievements:

- Initiated the development of the new queue management system
- Created and structured project documentation (functional requirements, technical descriptions, algorithms)
- Successful collaboration with partners, ensuring uninterrupted system operation
- Ensured the opening of new service stations and execution of implementation activities according to plan

"Business Management College" (Education Sector)

07/2023 – 05/2024 ~~Project-based work~~ IS Analyst, IT Project Manager

Maintained and improved internal projects, conducted business process analysis, drafted technical tasks, communicated with external service providers, and defined internal business needs.
